

SOUTHEAST ARKANSAS COLLEGE

Emergency Medical Sciences

EMT-ADVANCED

Emergency Medical Sciences EMT - Advanced is an introductory survey of advanced emergency medical services including medical legal/ethical aspects of patient assessment, care of wounds and fractures, airway maintenance, patient transportation, medical and environmental emergency, childbirth, intravenous (IV) access, drug administration, advanced treatment of medical and trauma patients and extrication.

The program prepares graduates for employment with ambulance services and in acute emergency facilities.

Graduates are eligible to apply to take the examination for national certification as an AEMT.
